TRANSPORT PLANNING & DESIGN SERVICES

We are an **SBE/MBE certified** consulting firm providing Transport Planning & Design services in the region. With experience in crash analysis, street design, walking audits, data collection, and technical writing, we engage in various aspects of infrastructure projects. From the initial stages of ideation, planning, and securing funding, through intermediate steps of concept development, community engagement, to the final stages of design and construction. We offer flexibility to our clients through various delivery methods such as on-call task orders, staff extensions, design-bid-build, and design-build.

At Puram, we believe that people lead a multi-modal life, relying on different forms of mobility to fulfill their transportation needs. Our goal is to help build a transportation system that provides people with the **freedom to make choices** – while ensuring **safety, comfort, and reliability** across all modes of travel.
